

Analysis Report of
Student Satisfaction Survey 2019-20

- Good teaching learning environment and university is providing all required facilities for learning and all teachers are supportive.
- Encouragement for learning more, good teaching methodology and over-all teaching is good.
- Overall teaching learning process is well organised.
- Arrange more activities other than the syllabus like sports and industrial visit etc. It gives practical knowledge to the students.
- Practical knowledge is very helpful compare to full time theory especially in arts.
- Some students are facing problems in assignments submissions by online mode as majority of students are from rural areas and face internet connectivity problems.
- Teachers need to guide students in getting placed in the good company/corporate sectors.
- Encourage students to improve their skills to take up competitive examinations
- More interactive classes needs to be organized
- Additional programs to encourage students for extracurricular activities in order to improve their skills, adopt different methods to overcome weakness of students, promote internships,
- Improvement in Audio visual method of teaching is required.
- Understand the student's weakness to encourage all the students to learn.
- Internal assessment marks must be published online and previous year question papers must be made available in library.
- A library facility needs to be improved and research orientation must be emphasised.
- Cutting edge technological laboratory facilities to be provided.
- Some departments encourage and conduct orientation programs to qualify NET/JRF/SET and other exams. Organise webinars/workshops to encourage students and also provide certificates, this encourage many students and should be continued. Staff members encourage students to take internship and summer research programs.
- Teaching is more effective with sufficient equipment's in laboratory.
- Department website needs to be dynamic and more online seminars to be conducted to educate various aspects of the subject and other general issues.
- Focused media classes for better understanding.

- Give a digital teaching along with the blackboard works it's makes attractive to any kind of students.
- Usage of better graphics and visual media to engage classes.
- Provide jobs related training programs. Upgrade syllabus pattern to global competitive training to students to real work skills like practical experience of GST, IT etc.
- To attract the students use updated technologies & more preference to practical works and use both English and Kannada language for teaching.
