**Collaboration Letter**

**09-11-2021**

I am extremely pleased to collaborate with **Dr. M. N. Kalasad**, Associate Professor, Department of Studies in Physics, Davangere University, Shivagangotri, Davangere-577007, Karnataka, India. Our research collaborative work includes Quantum Dots Synthesis and Opto-electronic properties studies, thin films, composite materials and applications. The collaboration and exchange ideas would be rather fruitful and I am of the opinion that this will continue in the coming years in related journal/conference publications, conducting conferences, exchange programs, in the above mentioned specified area.

Dr. R. M. Hodlur
