TO WHOMSOEVER IT MAY CONCERN

It is my pleasure to serve as a collaborator with Dr. K M Eshwarappa, Associate Professor, Department of Physics, Davanagere University. Our collaborative research work is extensively focused on the polymers, nanocomposites, thin films, and nanomaterials. We have communicated the outcomes of the research work to the reputed journals.

My research group (**Nanomaterials and Polymer Physics Lab**) works on thin films, semiconducting materials, and nanomaterials for various applications. I would support developing research methods to create new applications to get good outcomes from the research. The implemented methodologies, the outcome of the results can be published in peer-reviewed journals, which are useful for future research. Further, my cooperation with your research group and your Institution on both technology and the studies will be extended to develop both institutions' research.

Regards

(Gurumurthy S C)
