

ದಾವಣಗೆರೆ

ವಿಶ್ವವಿದ್ಯಾನಿಲಯ

# DAVANGERE UNIVERSITY

Syllabus for **Bachelor of Science (Computer Science)**

3<sup>rd</sup> and 4<sup>th</sup> Semester

[According to SEP (State Education Policy): 2024-25]

WEF: 2025-26 & onwards

  
BOS Chairman  
Dept. of Computer Science  
Davangere University  
Shivagangotri, Davangere

  
Prof. M. Govindappa  
Dean-Science & Technology  
Davangere University  
Shivagangotri, Davangere-577007

  
Registrar  
Davangere University  
Shivagangotri, Davangere.

DEPARTMENT OF STUDIES IN COMPUTER SCIENCE,  
DAVANAGERE UNIVERSITY, DAVANAGERE – 577007

**Bachelor of Science(BSc[CS]) Semester Scheme curriculum structure for  
UnderGraduate(UG) Programme**

| Semester | Paper Code            | Title of the Paper   | Subject Category  | Teaching Hours/Week | Semester End Exam | Internal Assessment | Total Marks | Credits   | Examination Duration |
|----------|-----------------------|--|---|---------------------|-------------------|---------------------|-------------|-----------|----------------------|
| 3        | 24-MC-III             | DataBase Management Systems  | MC-T  | 04                  | 80                | 20                  | 100         | 03        | 3Hrs                 |
|          | Practical-III         | SQL Lab  | MC-P  | 04                  | 40                | 10                  | 50          | 02        | 3Hrs                 |

### Course Learning Objectives

1. Understand the Fundamentals of Database Systems: Gain a comprehensive understanding of the purpose, applications, and architecture of database systems, including the roles of database users and administrators.
2. Master the Relational Model and SQL: Develop proficiency in the structure of relational databases, relational algebra, and the use of SQL for data definition, querying, and manipulation.
3. Apply Database Design Principles: Learn to design databases using the Entity-Relationship (E-R) model, including identifying entities, relationships, and constraints, and translating them into relational schemas.
4. Evaluate and Optimize Relational Database Designs: Explore the principles of good relational design, normalization techniques, and functional dependencies to create efficient and reliable database structures.
5. Comprehend Transaction Management: Understand the concepts of transactions, including
6. Atomicity, durability, isolation, and serializability, and their role in maintaining database integrity.

### Learning Outcomes

1. Explain Database Concepts: Students will be able to articulate the purpose, components, and historical evolution of database systems, as well as differentiate between various database languages and architectures.
2. Construct and Query Databases Using SQL: Students will demonstrate the ability to write SQL queries, define database schemas, and perform operations such as joins, set operations, and modifications while handling integrity constraints.
3. Design Effective Database Schemas: Students will create Entity-Relationship diagrams and map them to relational schemas, incorporating complex attributes, cardinalities, and primary keys effectively.
4. Normalize and Decompose Relational Designs: Students will apply normalization techniques and functional dependency theory to evaluate and refine database designs, ensuring they meet desired normal forms.
5. Analyze Transaction Properties: Students will assess transaction models and explain how atomicity, durability, and isolation contribute to reliable database operations.

### Course Chapters:

#### 1. Introduction:

14Hrs

Database-System Applications, Purpose of Database Systems, View of Data, Database Languages, Database Design, Database Engine, Database and Application Architecture, Database Users and Administrators, History of Database Systems. **Relational Model:** Structure of Relational Databases, Database Schema, Keys, Schema Diagrams, Relational Query Languages, The Relational Algebra.

#### 2. SQL: :

14Hrs

Overview of the SQL Query Language, SQL Data Definition, Basic Structure of SQL Queries, Additional Basic Operations, Set Operations, Null Values, Aggregate Functions, Nested Subqueries, Modification of the Database, Join Expressions, Views, Transactions, Integrity Constraints, Authorization.

#### 3. Database Design Using the E-R Model: :

14Hrs

Overview of the Design Process, The Entity-Relationship Model, Complex Attributes, Mapping Cardinalities, Primary Key, Extended E-R Features, Entity-Relationship Design Issues, Alternative Notations for Modeling Data.

**4. Relational Database Design: :****14Hrs**

Features of Good Relational Designs, Atomic Domains and First Normal Form, Decomposition Using Functional Dependencies, Normal Forms, Functional-Dependency Theory, Algorithms for Decomposition Using Functional Dependencies, Decomposition Using Multivalued Dependencies, More Normal Forms. **Transactions:** Transaction Concept, A Simple Transaction Model, Storage Structure, Transaction Atomicity and Durability, Transaction Isolation, Serializability.

**Text book:**

1. Database System Concepts, 7th Edition-Abraham Silberschatz, Henry F. Korth, S. Sudarshan
2. "Database Management Systems", A Practical Approach (DBMS) by Rajiv Chopra.
3. Oracle Database SQL Language Quick Reference - Oracle

**References:**

1. Navathe and Elmarri "fundamentals of database Systems"-Addison Wesley-200.
2. C.j. Date "introduction to Database systems" Addison-wesley.
3. Ullman "Principals of Data base systems" computer science press".
4. Bipin C Desai "Introduction to Data base system" Galotia.

| <b>BSc 3<sup>rd</sup> Semester</b> |               | <b>SQL Lab</b>         |    |
|------------------------------------|---------------|------------------------|----|
| Subject Code :                     | Practical-III | Total Teaching Hours : | 56 |
| IA Marks:                          | 10            | Teaching Hours/Week :  | 04 |
| Exam Marks:                        | 40            | Examination Hours :    | 03 |
| Credits:                           | 2             |                        |    |

Consider the following database :

1. employee(emp\_id, first\_name, last\_name, job\_id, doj, salary, dept\_id, manager\_id)
2. departments (dept\_id, dept\_name, manager\_id)
3. customer (cust\_id, first\_name, last\_name, address, city, phone, email)
4. salgrade (grade, highsals, lowsals)

Insert values into tables depending on the requirements for the queries. Each of these Following Subtopics should have at least 4 Queries Each.

1. Working with Table and data using another table.
2. Modifying table structure and updating data.
3. Queries adding deleting and verifying Keys.
4. Using Where Clause(Comparison, between and set comparison).
5. Using Where Clause(Matching Characters and NULL values).
6. Using Where Clause (Using Logical operators to join more than one conditions).
7. Formatting the output Result by putting Column aliases, using expressions and ordering the Data.
8. Using SubQueries in where Clause. (Set Membership, Set comparison, Test for Empty Relations)
9. Sub Queries in From Clause.
10. Aggregate Functions.
11. Joining Tables using SQL Joins (Inner Join, Outer Joins).
12. Set Operators.
13. Creating and working with views.
14. Using Group By & having clause and Order by clause.
15. Using Inner queries / Sub queries

**Examination:**

- Implementation may be done in any Database software Like Oracle, MySQL depending on the availability.
- No Graphical Query design is allowed in the examination, all queries must be through commands only.
- Any Two questions may be given to student for examination, Required tables has to be created by the student during examination, At least 5 rows or as required for generating output of the queries.

**Examination:**

- Two Questions has to be given from the above list
- Student has to write and execute both of the programs

**Marks Distribution:**

|                  |   |                   |
|------------------|---|-------------------|
| Practical Proper | Writing & Execution of both of the Programs | 30(Each 15 marks) |
|                  | Total                                       | <b>30 marks</b>   |
| Viva             |   | 10 marks          |
| <b>Total</b>     |   | <b>40 marks</b>   |

Elective Title: **Artificial Intelligence**

|   |                               |
|---|-------------------------------|
| Course Code: BSC  | Total Teaching Hours : 32     |
| Semester: 3rd   | Teaching Hours Per Week: 2hrs |
| IA Marks: 10  | Examination Hours: 2hrs       |
| Exam Marks: 40  | Course Credits: 2             |
| <p><b>Course Learning objectives:</b> The course aims to:</p> <ol style="list-style-type: none"> <li>1. To introduce the fundamental concepts and techniques of Artificial Intelligence.</li> <li>2. To develop the ability to solve AI problems using heuristic and algorithmic approaches.</li> <li>3. To provide insights into knowledge representation, reasoning, and learning in AI.</li> <li>4. To equip students with practical skills using AI tools and libraries (e.g., Python, NLTK, sci)</li> </ol>                          |                               |
| <p><b>Course Outcomes:</b> After successful completion of this course, students will be able to:</p> <ul style="list-style-type: none"> <li>• <b>CO1:</b> Describe the foundational principles and approaches of Artificial Intelligence.</li> <li>• <b>CO2:</b> Apply AI algorithms such as search strategies, logic, and knowledge representation.</li> <li>• <b>CO3:</b> Implement machine learning models using Python-based libraries.</li> <li>• <b>CO4:</b> Analyze real-world problems and propose AI-based solutions.</li> </ul> |                               |
| <p><b>Unit I : Introduction to Artificial Intelligence</b> <span style="float: right;"><b>16hrs</b></span></p> <p>History and Evolution of AI, Foundations and Applications of AI, Intelligent Agents and Environments. Types of Agents, Problem-solving Agents. AI vs Machine Learning vs Deep Learning. Problem Formulation, Search Strategies: Uninformed: BFS, DFS, UCS, Informed: Greedy Search, A*. Heuristics and Evaluation Functions,</p>  |                               |
| <p><b>Unit II: Knowledge Representation &amp; Reasoning</b> <span style="float: right;"><b>16hrs</b></span></p> <p>Propositional Logic &amp; Predicate Logic, Inference Rules, Forward and Backward Chaining, Ontologies and Semantic Web, Knowledge Representation using Graphs and Frames. Introduction to Machine Learning: Supervised, Unsupervised, and Reinforcement Learning. Basic ML Algorithms: k-NN, Decision Trees, Naive Bayes.</p>  |                               |

**Course Learning Objectives:** Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods etc and understand the principles of inheritance, packages and interfaces, exception handling mechanisms and applets and Graphical User Interface.

**Course Outcomes: On successful completion of the course, the students will be able to**

- Implement Object Oriented programming concept using basic syntaxes of control structures, strings and function for developing skills of logic building activity.
- Identify classes, objects, members of a class and the relationships among them needed for a finding the solution to specific problem.
- Demonstrates how to achieve reusability using inheritance, interfaces and packages and describes faster application development can be achieved.
- Demonstrate understanding and use of different exception handling mechanisms and concept of multithreading for robust faster and efficient application development.

**Syllabus structure for Each Core Course (Paper)**

**56 Hours**

**Unit-I**

**14 Hrs.**

**Basic concepts of OOP's,** Object-oriented paradigm, Basic concepts of object-oriented programming, Benefits of OOP, Application of OOP, JVM.

**Java Fundamentals** Features of Java, Java Features, overview of java language, Constants, Variables, Data types, operators and Expressions, Decision making and Branching, Decision making and looping, Arrays-types of arrays.

**Unit-II**

**14 Hrs.**

**Objects and Classes**

Defining a class, Adding Variables, Adding Methods, creating objects, Accessing Class members, Constructors, finalize() method, Method Overloading, Overriding Methods, Final Variables and methods, Final Classes, Abstract classes and methods, Visibility control, Strings, and Vectors, Abstract classes, Static classes, Wrapper classes, This, Super,

**Unit-III**

**14 Hrs.**

**Inheritance, Exception handling and Multi-threaded Programming:**

Defining inheritance, types of inheritance, extending a Class, Multiple inheritance, interfaces, packages: Java API Packages, Creating Packages, accessing a package, using a package.

**Exception handling:** Exception as objects, Exception hierarchy Try, catch, finally, Throw.

**Multi-threading:** Thread Life cycle, multi-threading advantages and issues, Simple thread program, Thread synchronization.

**Unit-IV**

**14 Hrs.**

**Java Server Pages: JSP:** Introduction, Architecture of JSP, Life Cycle of JSP, Scripting elements (Scriptlets, JSP Declarations, JSP Expression), Directive Elements (page, include, taglib), JSP Actions (include, setproperty, getproperty, forward, text), Implicit objects (request,

response, out, page, Exception), including HTML in JSP. Introduction to JDBC.

**Text Books:**

1. Programming with Java A Primer, E.Balaguruswamy Tata McGraw Hill Companies

**Reference:**

1. The complete reference JAVA, Herbert Scheldt. TMH
2. Herbert Schildt, The Complete Reference Java2.0, Fifth edition, TATA McGraw-Hill Company.
3. Debasish Jana, Java and Object-Oriented programming Paradigm, PHI.
4. Jana, Java and Object Oriented Programming Paradigm, PHI (2007).

Main Examination Question Paper Pattern  
**Third/Fourth Semester BSc Degree Examinations-2025**

COMPUTER SCIENCE

Paper :< Subject>

Time: 3 Hours

Max. Marks: 80

SECTION-A

Answer **all** of the following questions:

(2×10= 20)

1.

- a.
- b.
- c.
- d.
- e.
- f.
- g.
- h.
- i.
- j.

SECTION-B

Answer **any Six** of the following:

(5×6= 30)

- 2. From Unit-1
- 3. From Unit-1
- 4. From Unit-2
- 5. From Unit-2
- 6. From Unit-3
- 7. From Unit-3
- 8. From Unit-4
- 9. From Unit-4

PART-C

Answer **any Three** of the following:

(10×3= 30)

- 10. From Unit-1
- 11. From Unit-2
- 12. From Unit-3
- 13. From Unit-4

Main Examination Question Paper Pattern  
Third/Fourth Semester BSc Degree Examinations-2025

COMPUTER SCIENCE

Paper :< Subject>

Time: 2 Hours

Max. Marks: 40

SECTION-A

Answer all of the following questions:

(2×5= 10)

- 1.
- 2.
- 3.
- 4.
- 5.

SECTION-B

Answer any Six of the following:

(5×6= 30)

6. From Unit-1
7. From Unit-1
8. From Unit-1
9. From Unit-1
10. From Unit-2
11. From Unit-2
12. From Unit-2
13. From Unit-2
